Personal Projects

Personal Portfolio

I decided to include the portfolio because it seemed like an interesting project because of the technologies I used to build it, Next JS (such as Static Site Generator), Strapi CMS to build a rest api with the project information, among other technologies.

↗ View Project

Snapcode App

Snapcode is an application to create code snippets, download, save and delete them using GitHub as authentication provider & Supabase. In this project the focus is on backend interaction, authentication, private routes and micro interactions using Framer Motion.

↗ View Project

Moderne App

Moderne is an app for a fictitious hi-tech property construction company, in this project the focus is on animations using both Framer Motion and CSS, consuming apis using React Query as well as using Context api to manage internal global state.
